

## National Recycle Day, November 15, 2018

Let's do something today to join the fight to save our resources by recycling! To help be a better recycler, download the **free** app to your phone; **RECYCLE COACH** (in the app store)

To date, at least 100 residents have downloaded the app and are using it to be better recyclers. It's so easy and user friendly. The schedule lists the days for garbage, recycle, bulky items, shredding days, and hazardous materials. If you're not sure if an item can be recycled, check out what goes where. The Communication tab allows you to directly contact the Borough of Mantoloking to notify them of an issue.

In addition to recycling:

- Reuse the one and done plastic items
- Replace one use plastic water bottles with aluminum water bottles
- Refuse plastic bags and bring reusable bags to the grocery store and for small item shopping.

We live on a fragile barrier island with water surrounding us. Find ways to preserve and protect this precious place that we all love. Everyone that walks on the beach or sails on the bay sees plastic everywhere. The choice is ours to decide. We can do this and keep this very special place for future generations.
