

ORDINANCE 677

**AN ORDINANCE OF THE BOROUGH OF
MANTOLOKING, COUNTY OF OCEAN, STATE OF
NEW JERSEY AMENDING AND SUPPLEMENTING
THE MUNICIPAL CODE OF THE BOROUGH OF
MANTOLOKING, SO AS TO ADD CHAPTER 25,
ENTITLED "PROPERTY MAINTENANCE."**

BE IT ORDAINED by the Mayor and Borough Council of the Borough of Mantoloking, County of Ocean, and State of New Jersey, as follows:

SECTION 1. The Municipal Code of the Borough of Mantoloking is hereby amended and supplemented so as to add Chapter 25, entitled "Property Maintenance," so as to entirely as follows:

Chapter 25. Property Maintenance

Article 1. Adoption of Code

§ 25-1 Adoption of Standards by Reference.

Chapters 1, 2 and 3 of the 2015 International Property Maintenance Code, together with any subsequent amendment, change or supplement thereto, is adopted and incorporated as fully as if set out at length herein, save and except such portions as are hereinafter deleted, modified or amended, if any, prescribed in § 25-2 of this Article.

§ 25-2. Changes, additions and exceptions.

The changes, additions and exceptions elective in this municipality to said code are as follows (section references hereinafter set forth are to sections as set forth in said code):

1. Section PM-101.1 (page 1, second line): insert "Borough of Mantoloking."
2. Section PM-102.3 is deleted and replaced with, "Repairs, additions or alterations to a structure, or changes of occupancy, shall be done in accordance with the procedures and provisions of the State Uniform Construction Code Act, the State Uniform Safety Act, and any other standards or procedures required by the laws of State of New Jersey and by federal law. If none are applicable, repairs, additions or alterations to a structure, or changes of occupancy, shall be done in accordance with the procedures and provisions of the International Building Code, International Fuel Gas Code, International Mechanical Code and the ICC Electrical Code."
3. Section PM-103.1 is deleted.
4. Section PM-103.2 is deleted and replaced with "Inspections and issuing orders in connection therewith under the provisions of the 2006 International Property

Maintenance Code shall be the exclusive responsibility of the Code Enforcement Official.

5. Section PM-103.3 is deleted.
6. Section PM-103.5 is deleted.
7. Section PM-106.3: replace "misdemeanor" with "ordinance."
8. Section PM-106.4: Violations and Penalties are governed by § 25-4 Violations and Penalties of the Borough Code.
9. Section PM-109.6 is deleted.
10. Section PM-110.3 is hereby amended and supplemented to add the following sentence to the end of said section: "The code official shall follow the procedures set forth in Chapter 13 of the Borough Code of the Borough of Mantoloking in regard to the raising, demolition and removal of the structure and placing a lien against the subject premises to recoup the costs incurred by the Borough."
11. Sections PM-111.0 through PM-111.7 shall be deleted, and in their place inserted Sections PM-111.0 and PM-111.1, which shall provide as follows:

PM-111.1 Any person affected by decision of the code official of a notice or order issued under this code shall have the right to appeal such determination to the Superior Court of the State of New Jersey in accordance with appropriate state statutes or court rules.
12. Section PM-202.2 is hereby amended to define "Code Official" as follows:

The Code Enforcement Officer who is charged with the administration and enforcement of this Property Maintenance Code or any other duly authorized representative of the Borough of Mantoloking.
13. Section PM-302.4 (page 11, second line): insert "10 inches."
14. Section PM-302.8 is amended to add subsection 302.8.a, Machinery
PM-302.8a Machinery, Except as provided from in other regulations, no inoperative machinery or building materials which are not in contemplation of immediate use in the construction, repair or remodeling of any house, building or other structure on the lands shall be parked, kept or stored on any premises in any Residential Zone.

§ 25-3. Copies on File.

Ten copies of the said code, entitled the "2006 International Property Maintenance Code," as prepared and published by the International Code Council, marked with amendments and deletions hereinabove set forth, are to be filed in the office of the Borough Clerk of the Borough of Mantoloking and shall remain on file there for use and examination by the public.

§ 25-4. Violations and Penalties.

A. Any person violating or failing to comply with any of the provisions of this article shall, upon conviction thereof, be punishable by a fine of not less than \$100 nor more than \$1,000, by imprisonment for a term not to exceed 90 days or by community service of not more than 90 days, or any combination of fine, imprisonment and community service as determined in the discretion of the Municipal Court Judge except as provided for in Subsection C of this Section. The continuation of such violation for each successive day shall constitute a separate offense,

and the person or persons allowing or permitting the continuation of the violation may be punished as provided above for each separate offense.

B. The violation of any provision of this article shall be subject to abatement summarily by a restraining order or injunction issued by a court of competent jurisdiction.

C. Penalties for Specific Offenses

1. A violation of PM-302.4 for Grass and Noxious Weeds shall be punishable by a fine of \$79.00.

2. A violation of P.M-108.1 for unsanitary conditions shall be punishable by a fine of \$304.00.

3. A violation of P.M.-302.8 for inoperative motor vehicles shall be punishable by a fine of \$150.00.

4. A violation of P.M.-302.8.a for unused machinery shall be punishable by a fine of \$150.00.

5. A violation of P.M.-308.1 accumulation of rubbish or garbage shall be punishable by a fine of \$150.00.

NOTICE

NOTICE IS HEREBY GIVEN that the foregoing ordinance was introduced and passed by the Borough Council on first reading at a meeting of the Borough Council of the Borough of Mantoloking held on the 20th day of **March, 2018**, and will be considered for second reading and final passage at a regular meeting of the Borough Council to be held on the **24th day of April, 2018**, at 5:30 p.m., at the Mantoloking Yacht Club located at 1228 Bay Ave in Mantoloking, New Jersey, at which time and place any persons desiring to be heard upon the same will be given the opportunity to be so heard.

Beverley A. Konopada, RMC, CMR
BOROUGH OF MANTOLOKING

Honorable George C. Nebel
MAYOR

ORDINANCE NO. 676

AN ORDINANCE OF THE BOROUGH OF MANTOLOKING, COUNTY OF OCEAN, STATE OF NEW JERSEY, AMENDING AND SUPPLEMENTING CHAPTER XI OF THE BOROUGH CODE OF THE BOROUGH OF MANTOLOKING, ENTITLED "PROTECTION OF BEACHES AND DUNES"

NOW, THEREFORE, BE IT ORDAINED, by the governing body of the Borough of Mantoloking, County of Ocean, State of New Jersey, as follows:

SECTION 1. The Borough Code of the Borough of Mantoloking is hereby amended and supplemented so as to repeal in its entirety Chapter XI, entitled "Protection of Beaches and Dunes," and to replace with a new Chapter XI, which shall be entitled "Protection of Beaches and Dunes" and which shall read as follows:

§11-1 PRESERVATION AND PROTECTION OF DUNES.

§11-1.1 Findings, Declaration and Purpose.

Although there may be no long-term defense for fixed oceanfront structures against a constantly rising ocean level, effective protection of the oceanfront and adjacent coastal areas in the intermediate term against high tides and flooding and against damage by the ocean under storm conditions requires sufficient elevation and breadth in the beach and dune areas, hereinafter defined, to dissipate the force of the waves. The dunes should provide an uninterrupted barrier and a source of sand to mitigate the effect of storm waves for the benefit of the entire Borough - interior lands as well as oceanfront premises - and a beach for the recreational purposes of all. Accordingly, the Borough has a vital interest in the continued maintenance and protection of the ocean Beach and Dune Areas and in the right to cause their restoration in the event of damage or destruction.

Maintenance and protection of the ocean beach and dune areas are also a requirement of the Borough under a State Aid Agreement (SAA) between the Borough and the New Jersey Department of Environmental Protection (NJDEP) and consistent with the conditions of the United States Army Corp of Engineers (USACE) 50-year duration Beach and Dune System Federal Shore Protection Program initiated in December 2016 and extending to December 2066.

Dune Areas are vulnerable to erosion by wind, water, the absence of good husbandry by those responsible for their maintenance and preservation, and by indiscriminate trespass, construction or other acts which might destroy or damage them. A proven and available means of protecting Dune Areas against erosion is by preventing indiscriminate trespassing, construction or other acts which might destroy or damage them, and through the aggressive use of native plantings supplemented, when necessary, by sand fencing and other protective devices, or combinations thereof, designed to prevent the erosion of Dune Areas and to promote the root accumulations,

normal contours and other features found in natural dune systems and to aid in long term stabilization of engineered dune systems.

The Beach Area and Dune Area are dynamic and are not capable of rigid definition or delineation, or of completely firm stabilization. They can and do migrate, so that particular sites, at one time free of dunes may, as the result of natural forces, become a part of the Dune Area declared to be in the interest of the Borough and State of New Jersey to protect. Persons owning, using or purchasing such property do so subject to the public interest therein and also bound by the limitations and conditions of easements exercised by the previous owners with the Borough and NJDEP or obtained by the NJDEP under eminent domain.

It is a purpose of this chapter to define the areas so affected and to continue regulations to assure their effectiveness. This chapter does not attempt to define and regulate all parameters of dune delineation, function or management and the Borough Council declares its intent to review and update this chapter periodically to reflect appropriately new and beneficial knowledge; and to be consistent with State and Federal agreements and regulations. This chapter is declared to be an exercise of the police power in the interest of safety and welfare for the protection of persons and property. Further, this chapter is adopted in recognition of the knowledge and benefits realized by the implementation of prior enactments which have been operative since 1980 and which have been favorably endorsed by scientific and governmental authorities. By this enactment, it is the intention of the Borough to reflect and utilize the knowledge and experience gained in the administration of prior Beach and Dune Ordinances in the Borough of Mantoloking to ensure a viable beach and dune system exists in the Borough for coastal protection to the benefit of all Mantoloking residents and the environment.

In view of the fact that the Bar-Beach-Dune System provides the primary protection to property, public and private, and persons within the Borough, from the clearly present hazards of erosion and flooding caused by the Atlantic Ocean during periods of storm, and otherwise, all of the provisions of this chapter are deemed necessary, material, and substantial; therefore, they shall not be subject to waiver or variance.

§11-2 DEFINITIONS.

§11-2.1 Word Usage.

For the purpose of this chapter, certain words or phrases shall be interpreted in the following manner:

- a. Words used in the present tense include the future tense.
- b. Words used in the singular include the plural, and conversely words in the plural include the singular.
- c. Words used in the masculine include the feminine.
- d. The word "shall" is mandatory and not discretionary.

§11-2.2 Definitions.

All terms and language utilized in this chapter shall be accorded their common and customary meaning, except where specifically defined herein as follows:

Appendix shall mean that portion of this chapter entitled "Appendix", and is incorporated herein.

Backslope of the Dune shall mean the area of the dune between the landward toe of the dune and the landward dune crest.

Beach Area shall mean that area between the Mean High-Water Line of the Atlantic Ocean, and the Seaward Edge of the Dune as hereinafter defined.

Borough shall mean the Borough of Mantoloking, Ocean County, New Jersey.

Borough Clerk shall mean the Municipal Clerk of the Borough of Mantoloking, Ocean County, New Jersey.

Borough Council shall mean the Municipal Council of the Borough of Mantoloking, Ocean County, New Jersey.

CAFRA shall mean the Coastal Area Facilities Review Act, N.J.S.A. 13:19-1 et seq., and regulations issued thereunder at N.J.A.C. 7:7 et seq., as may be amended from time to time.

CZM Regulations shall mean the present NJDEP Coastal Zone Management Rules adopted by the NJDEP under N.J.A.C. 7:7 or as may be amended.

Deed of Dedication and Perpetual Storm Damage Reduction Easement shall mean that agreement exercised by the owners of each oceanfront property (past or present) or obtained for the oceanfront property by NJDEP eminent domain proceedings which sets forth the conditions of use and access to implement the USACE Beachfill and Dune Project.

Dune Area shall mean that area between the seaward edge of the dune as exists or as established by the USACE Beachfill and Dune Project or as may advance easterly through natural accretion from that initial point and the landward edge of the dune as exists; is constructed as part of the USACE Beachfill and Dune Project or as may be created by natural migration of the dune to the west.

Dune Consultant shall mean an expert on dunes and their care retained by the Borough.

Dune Inspector(s) shall mean that person or those persons appointed by the Mayor with the consent of the Borough Council to observe and regulate activities on the dune consistent with the Borough Dune Ordinance.

Dune Platform (Deck) shall mean a wooden construction platform (deck) placed in the dune area, in accordance with requirements set forth herein and consistent with NJDEP exemption status under the prevailing NJDEP Coastal Zone Management Regulations; or as previously approved by the Borough; or as constructed prior to the Borough's initial Dune Ordinance adoption.

Dune Program Director shall mean that person appointed by the Mayor with the consent of the Borough Council designated to advance the Borough's Dune Ordinance goals and program and maintain consistency of same to meet NJDEP and USACE requirements; or if not formally appointed, any person temporarily directed by the Mayor or Borough Council to perform those duties.

Dune Vegetation shall include all plant species found on beaches and dunes of northeastern United States, either native or introduced, which can build and stabilize sand dunes. Specifically, it shall include, but not be limited to, such species as American beachgrass (*Ammophila breviligulata*), sea rocket (*Cakile edentula*), seaside spurge (*Euphorbia polygonifolia*), dune cordgrass (*Spartina patens*), seaside goldenrod (*Solidago semipervirens*), dusty miller (*Artemisia stelleriana*), bayberry (*Mryica Pennsylvaniae*), beach pea (*Lathyrus japonicus*), salt spray rose (*Rosa rugosa*), beach plum (*Prunus maritima*), panicum grass, etc., which normally grow or may be planted on the slopes of the dunes or behind them, with no distinction being made as to how such plants are introduced into their location.

Earth Anchor shall mean an auger type anchor utilized to protect against wind uplift of dune platforms typically constructed of galvanized or stainless steel with a minimum penetration below the dune surface of 30".

Elevated Walkway shall mean an improved walkway connecting to the dune crest which is supported on timber posts, piles, etc. and which must meet NJDCA foundation requirements consisting of a NJPE designed foundation to address wave forces and wave scour. Elevated walkways may only be installed westerly of the prevailing dune crest or as may have existed and approved prior to the USACE Beachfill and Dune Project requirements.

Foreslope of the Dune shall mean the section of the dune face between the seaward crest of the dune and the seaward edge of the dune where it intersects the beach.

GP - 2 shall mean the Borough's NJDEP General Permit 2 for dune repair and beach maintenance.

Landward Dune Crest shall mean the intersection line of the backslope of the dune and the top of dune, with a typical elevation 22.00 NAVD88 if constructed as part of the USACE Beachfill and Dune Project or higher if naturally developed.

Landward Edge of the Dune shall mean the intersection line of the backslope of the dune and the natural or site plan approved grade of the land extending from the east boundary of New Jersey Route 35 or East Avenue, eastwardly, or the line joining the average landward edge of the dune of the adjoining oceanfront properties, or the dune easement line as shown on the official Dune Easement Line Map adopted by the Borough to meet USACE future dune limit needs, whichever is the more westerly.

Mean High-Water Line shall mean the line found by the intersection of a plane at the elevation of mean high-water with the existing foreslope of the beach.

M.O.U. shall mean any Memorandum of Understanding executed between the Borough and the U.S. Fish and Game Wildlife Service to manage endangered species on a local level.

Oceanfront shall mean lands abutting the Atlantic Ocean. In the case of the Borough of Mantoloking, oceanfront properties are those located east of Ocean Avenue south of Lyman Street, and east of East Avenue north of Lyman Street.

NJDEP shall mean the New Jersey Department of Environmental Protection.

Pathway/Walkway shall mean an unimproved or improved, protective access way, at grade across the dune in accordance with the specifications set forth within this Ordinance.

Sand Fence shall include the term "snow fence" or "dune fence" of a barricade type established in a line or a pattern to accumulate sand and aid in the formation of a dune, such as picket construction consisting of wooden lath held together by wire and affixed to wooden posts. Alternate types of "sand fence" may be utilized if approved by the Dune Consultant.

Seaward Dune Crest shall mean the intersection line of the foreslope of the dune and the top of the dune, typically elevation 22.00 NAVD88 as constructed as part of the USACE Beachfill and Dune Project.

Seaward Edge of the Dune shall mean the intersection line of the foreslope of the dune and the gradient of the Beach Area, or the contour line at an elevation of eight point five (8.5) NAVD88, or the vegetation line, or whichever is the more easterly, except when the Borough Engineer, Borough Dune Inspector, NJDEP or USACE may have caused stakes to be driven to mark the seaward edge of the dune, in which case it is the line between such stakes.

Setback Line shall mean that line determined by the setback distances as may be specified in the Land Use Ordinance of the Borough to define the limits of development on a buildable lot.

State Aid Agreement(s) (SAA) shall mean the agreement(s) made between the Borough and the NJDEP to participate in the USACE Beachfill Project, or other such projects where the NJDEP provides financial grants to the Borough to support same.

Top of Dune shall mean the intersecting line of the seaward and landward dune crest; typically elevation 22.00 NAVD88 if constructed as part of the USACE Beachfill and Dune Project, or potentially higher if naturally accreted westerly of the USACE project dune construction limits.

USACE shall mean the United States Army Corps of Engineers.

USACE Beachfill and Dune Project shall mean the USACE Manasquan Inlet to Barnegat Inlet Storm Reduction Project authorized by the US Federal Government.

Upper Driftline (Rackline) shall mean that line produced by the spring tides (highest tides of the year) which contains ocean debris (flotsam such as seaweed, etc.) and the seeds, rhizomes, or detached plants which can germinate and/or grow to produce a zone of new dune vegetation.

Vegetation Line shall mean that line connecting the most westerly or seaward naturally occurring perennial plants with other such plants or plants placed by the USACE as part of the USACE Beachfill and Dune Project or as placed under a Borough implemented project or Borough approved private property owner planting program.

Walkway on Grade or Elevated shall mean a constructed means of crossing the dune area in accordance with specifications set forth herein.

§11-3 REGULATION OF BEACH AND DUNE AREAS.

§11-3.1 Construction Prohibited.

Construction east of the landward edge of the dune and the placement there, except temporarily, of any object that would impede the flow of sand is prohibited, except as provided in this chapter and in accordance with any NJDEP Coastal Zone Management Rules, CAFRA regulations, the Land Use Ordinance of the Borough (setback), and subject to permits as may be issued pursuant to these enactments.

§11-3.2 Access to Dune Areas.

No person shall be in the dune area unless:

- a. Upon a natural or improved pathway, walkway or dune platform; or
- b. In the performance of such activities as may be reasonable and necessarily required to construct or maintain the dune, dune vegetation or allowed structures with the permission of the owner; or
- c. For the purposes of inspection, topographical survey, or enforcement of this chapter; entry for these purposes shall not be deemed an actionable trespass; or
- d. As authorized by the USACE and/or the NJDEP and the Borough for the construction and maintenance of the initial or subsequent beach and dune construction projects as part of the USACE 50-Year Program and consistent with the terms of the perpetual Beachfill and Dune Maintenance Easement executed with each oceanfront property owner (past or present) to meet the terms of the Federal USACE Beachfill and Dune Project; or any subsequently Borough or NJDEP approved Beachfill and Dune project as may be implemented by the Borough pending unavailability of federal funds.

§11-3.3 Dune Walkways, Pathways, Platforms and Foreslope Steps.

- a. Only one (1) pathway or walkway, and associated dune backslope and foreslope singular set of steps, across the dune area is permitted for each residence in accordance with the prevailing NJDEP Coastal Zone Management Regulations, N.J.A.C. Section 7:7 - 10.41e. It shall run, generally, the shortest practical course between the residence and the seaward edge of the dune, and shall not exceed four (4) feet in width (see Appendix* for specifications). At street ends or public access ways, wider pathways may be delineated and constructed by the Borough, and/or USACE as part of the

approved USACE Beachfill and Dune Project. In the event that any private pathway or walkway shall be or become, in the opinion of the Dune Consultant, a substantial detriment to the development and maintenance of the continuous protective dune sought to be achieved by this chapter of the Borough Ordinances and the USACE Beachfill and Dune Project the owner of the premises shall be subject to the provisions of §11-4 which is not to be construed as not allowing the installation and maintenance of structures permitted under this Ordinance, but to be employed during needed dune repair or maintenance projects needed in response to major storm damage.

- b. In addition to the pathway or walkway, each oceanfront lot shall be allowed one (1) "Dune Platform" not to exceed two hundred (200) square feet for a single developable lot in a designated building zone situated within the dune crest or dune landward slope area. If a dune walkway is constructed adjacent to a dune platform, a clear separation of a minimum of one-half inch ($\frac{1}{2}$ inch), shall be provided between the dune platform and the walkway for the walkway not to be included in the platform area calculation. In the instance of a single consolidated lot which exists in the designated zone and is comprised of multiple conforming building lots, the size of the platform shall be allowed to be increased by 25% for each full conforming contiguous lot in the zone that comprises the total consolidated lot. Area increases of a dune platform shall not be considered for partial non-conforming lots in a zone which may be part of a singular ocean front lot.
- c. Dune Walkways, Pathways, Platforms and Foreslope Steps shall comply with the conditions included within each oceanfront properties Deed of Dedication and Perpetual Storm Damage Reduction Easement (with NJDEP State approval required for non-exempt structures) and the specifications as to construction details and location within the dune area as are set forth in the Appendix or as further defined under New Jersey State Law within VE-Zone areas.

§11-3.4 Removal of Dune Protection Devices Prohibited.

The removal, cutting, burning or destruction of dune vegetation, sand fence or such other types of dune protection devices approved by the Borough in the dune area is prohibited except as necessary for construction or maintenance of the Dune or USACE Beachfill and Dune Project or subsequent independent Borough beachfill and dune projects as may be implemented and as authorized pursuant to this chapter or Borough approved structures under this Ordinance.

§11-3.5 Natural Deposits of Sand.

Sand that has been transported onto lands of oceanfront lots by action of wind, tides, storms or any combination thereof shall not be removed from the lot upon which it has been deposited. To the extent practicable considering the utilization of the premises, this sand may be relocated by the owner of the lot and may be moved eastwardly on the same lot to become part of the beach and dune system, or in the case of hardship in transporting same directly across the lot to the beach and dune area, the sand may be transported to a street end with a vehicular access way upon approval by the Borough. Surplus sand deposited on any improved street ends shall be restored into the Beach and Dune Area in accordance with the regulations of the NJDEP Coastal Zone Management Rules and the Borough's Prevailing NJDEP issued GP-2 permit.

Any damage to existing dune vegetation as caused by the owner's sand transferring activities shall immediately be restored to comply with §11-3.7, §11-3.8 and Appendix II to §11-3.7.

§11-3.6 Maintenance of Dune Elevation.

One of the purposes of this chapter is to achieve the maintenance of sand dunes at the highest practical height and with a minimum dune crest elevation of 22.0 NAVD88 to match the USACE project dune crest design elevation or subsequent Borough adopted dune crest elevation as may be established by the Borough's due diligence in the future to address changing environmental conditions. To this end, the Borough will commit the appropriate resources as available to restore and maintain the beach and dune system from damage which may occur as a result of a major storm and as allowed by the NJDEP in accordance with the Borough's GP-2 permit and NJDEP CZM regulations. Borough actions may be taken in conjunction with the NJDEP and/or the USACE or independently as necessary to protect the Borough's residences, infrastructure and the health, safety and welfare of the Borough residences. The Borough's maintenance of the beach and dune system conducted in this regard shall be limited to the area east of the Borough and NJDEP adopted dune easement limit line. Maintenance in response to major storms shall include all required dune vegetation, public crossovers and dune foreslope toe fencing where previously installed by public funds. However, no dune shall be directly or indirectly lowered or reduced in height by the action or inaction of any owner or his agent. However, if by actions or use of the private property owner any dune shall be or become lower than the elevation deemed materially significant by the Dune Inspector or duly appointed Borough representative who is applying recognized criteria with due regard to the intent of this chapter and reasonable use of the premises, the owner thereof shall be obliged to provide and install additional sand to correct the damage and install such sand fence and plantings as are prescribed by this chapter. (See Appendix.) The owner shall have an obligation to maintain and replace, if necessary, such fences and plantings. If the dune is lowered or caused to be lowered by the direct or indirect action of any owner, then the dune shall, upon due notice to the owner, be restored to its prescribed elevation by the owner or at his expense and subject to the provisions of §11-4. The restored dune shall be planted and sand fenced in accordance with the specifications set forth in the Appendix. However, in consideration of maintenance of views from existing structures which may be obstructed by accreting sand on top of the USACE constructed dune crest above Elevation 22.0 NAVD88 an oceanfront owner has the potential right to apply to the Borough and the NJDEP for a permit to groom the top of the dune back to Elevation 22.0 NAVD88. If such activity is approved, the owner shall immediately plant Cape American Dune Grass in the groomed area on a spacing of 18" on center. Final determination on the permissibility of this activity shall be made by the NJDEP during review of the Applicant's permit application.

Crest grooming shall not be approved by the Borough unless the elevation of the dune is shown to be a minimum of one (1) foot above the Elevation 22.0 NAVD88 for a minimum of 50% of the dune crest area constructed as part of the USACE project. Dune elevation grooming shall not be permitted in natural dune areas unless specifically approved by the Borough and NJDEP under the NJDEP Dune Regulations established under N.J.A.C. 7:7-9.16" c".

§11-3.7 Vegetation and Sand Fencing.

- a. In order to provide for effective protection and/or restoration of the dune area, each owner shall plant or cause to be planted in the dune area suitable vegetation and erect, or cause to be erected, suitable sand fencing all in accordance with such standards as are provided in the Appendix to address natural incidental damage or vegetation die-off; which is not to be construed as to include needed vegetation replacement which may be required due to implementation or construction of a new or major dune repair implemented in response to a major coastal storm meeting the definitions to allow dune repair under the Borough's NJDEP approved GP-2 permit or other Borough, State or Federal beach and dune repair programs.
- b. However, the owner shall be responsible for the maintenance of vegetation and fencing on any natural dune sections existing on their property and in all cases west of the adopted dune easement line.

§11-3.8 Bulldozing and Mechanical Replenishment of Sand.

- a. No person or entity shall engage in the mechanical replenishment of the oceanfront beach dunes within the Borough without first obtaining a permit for such activity and proceeding in strict adherence with the terms and conditions of the permit. Mechanical replenishment shall be broadly defined to include the transport of sand from the berm by any mechanical means (bulldozing or like activity) to or into the dune area as well as the placement of clean natural sand obtained from off-site locations.
- b. No permits shall be issued at such times when, in the opinion of the Dune Consultant or the Borough's duly appointed representative, the beach area is not suitable for bulldozing due to physical or regulatory restrictions.
- c. The dune replenishment permit shall be issued by the Borough Dune Inspector and shall be conditioned in accordance with NJDEP CZM regulations and as follows:
 1. No mechanical dune replenishment activity shall be allowed from April 1st to September 1st, inclusive, or as may be allowed by NJDEP CZM regulations, except in case of emergency circumstances which constitute an immediate threat to residential structures, Borough infrastructure or to public health, safety and welfare as declared by the Mayor or Borough Council;
 2. No scraping or bulldozing of sand from the berm at a depth greater than one (1) foot from the grade existing prior to activity under the permit shall be allowed;
 3. Transport of sand from below the low-water line shall not be allowed;
 4. No person shall operate any motorized vehicle across or upon any dune area except as may be necessary for permitted construction, for dune maintenance and/or emergency or law enforcement responders in compliance with this chapter;
 5. No person shall operate mechanical sand transfer equipment on the beach unless in possession of a valid permit and in compliance with the terms and conditions of the permit and consistent with the Borough's GP-2 permit issued by the NJDEP;
 6. Permits shall be effective for six (6) months, but are based on a one (1) time use only;
 7. When possible, all replenished dunes shall be immediately protected by the erection of sand fence and vegetation in accordance with specifications set forth in the Appendix to this chapter noting seasonal considerations for vegetation survival;

8. All replenished dunes shall be graded to be as a minimum consistent with the USACE Beachfill and Dune Project dune template and/or as approved by the Borough Dune Inspector at the required slope and minimum adopted protective project dimensions and shall be protected by planting of appropriate vegetative cover all in accordance with specifications set forth in the Appendix to this chapter;
 9. Any permit issued hereunder may, in the event of violation of the terms of the permit, or in the event of conditions of the beach and dune systems and weather, which are not, at that time, consistent with the attainment and maintenance of a proper protective dune system, be suspended by the Dune Inspector. The action of the Dune Inspector shall be subject to review by the Borough Council upon written application of an aggrieved property owner. In the event of such application for review, the Borough Council shall promptly, after public hearing, affirm, reverse, or modify the determination of the Dune Inspector;
 10. The failure of any owner or contractor, or any agent of an owner or contractor, to obtain a permit for dune replenishment activities or to abide by the terms and conditions of the permit shall be deemed a violation of this chapter;
 11. In the event that a dune maintenance or replenishment project involves the placement of sand upon the dune under circumstances where the additional sand or a portion thereof is obtained from any off-site location, the added sand shall be of such grain size, shape, color and other characteristics as will, in the judgment of the Dune Consultant or Dune Inspector, be compatible with the existing on-site sand. The placement of sand from off-site locations shall be by such methods as will avoid damage to existing dunes and shall, whenever reasonably practicable, as determined by the Dune Inspector, be placed upon the dune from the landward side of the dune;
 12. The removal of sand from the beach or dune area to an off-site location is prohibited. The movement of sand from the dune area to the beach area is prohibited, unless if conducted in accordance with an approved NJDEP/Borough dune grooming permit.
 13. The Dune Inspector may, in the public interest, revoke any permit. Appeal from any revocation may be made to a court of competent jurisdiction.
- d. When dune replenishment activities are initiated, by either the homeowner, by the Borough or by the USACE, or USACE agents, any existing structures or improvements within the dune system are to be removed by the homeowner if necessary to eliminate direct conflict with completing the needed work so that the replenishment services can be completed with limited disruptions. When replenishment activities are conducted by the Borough or as part of the USACE Beachfill and Dune Project, residents will be notified and all improvements which directly conflict with the work and are found necessary to be removed to complete the work are to be removed by the homeowner and may be replaced by the homeowner at their discretion pending obtaining a new dune permit to allow the Borough to assess potentially needed modification to address changed conditions. In the event, that these improvements are not or cannot be removed by the homeowner, coordination for the removal shall be undertaken between the owner and by the Borough, USACE or USACE agents so initial construction or beach and dune replenishment activities can be completed. The Borough and USACE will try to work with the

homeowner to work around and maintain all approved existing structures where possible, however should it be found necessary that they must be removed to complete the project work, the Borough, USACE or USACE Agents will not be required to return removed improvements and are not subject to any damages to the improvements during their removal. Whether a private improvement or structure within the dune system is designated to be removed, as a last resort to resolve a direct physical conflict with the project it, shall be at the sole discretion of the Borough or USACE's approved agent consistent with any terms of the project Storm Damage Reduction Easement and legal limitations. A minimum of 10 days notice will be provided to homeowners if it is deemed that a private structure or improvement will directly interfere with Borough or USACE program initial construction or maintenance needs and requires relocation.

- e. A Borough approved on-grade walkway or on-grade dune platform may be raised vertically in the same footprint location without the burden of acquiring a new dune permit.

§11-3.9 Permits.

- a. A permit shall not be required for the planting of dune grass or other appropriate vegetation, or for the erection of sand fencing or the placement of temporary walkway protection in the dune area in compliance with approved standards set forth in the Appendix to this chapter.
- b. All other construction, modification, alterations or like activity in the dune area, unless specifically exempted in this chapter, shall require that the owner or his agent obtain a Dune Area Permit.
- c. Activities requiring a permit include, but are not limited to, elevated walkways, dune platforms, bulldozing, sand replenishment from off-site sources and the placement of sand fencing more than three (3) feet seaward of the seaward edge of the dune.
- d. All permits are subject to revocation, suspension or modification in the event of changed site conditions, as determined by the Dune Inspector.
- e. The Dune Area Permit shall be issued at no charge.
- f. The permit application is to be accompanied by a sketch, to scale, of the proposed improvements. The sketch may be prepared by the owner with reference to a pre-existing survey in form satisfactory to the Dune Inspector.
- g. Other Borough, NJDEP, NJDCA or USACE Permits may be required depending on the activity.
- h. Structures shall only be elevated as necessary to meet existing grade conditions to aid access for the property owner, however, the owner is advised that when a structure is proposed to be elevated above grade, it is considered to have a foundation by the NJDCA and is required to meet all DCA construction requirements in the subject flood zone.
- i. The permittee or any agent shall promptly, upon request, allow any Borough official to examine the permit or a certified true copy thereof at any time.

§11-3.10 Dune Inspection.

The Dune Program Director shall make periodic dune inspections and shall provide written advice to owners. These writings shall not be deemed as notice of violations of this chapter, but shall be maintained as part of the record for the subject property and may be considered by the Court in the imposition of penalties, upon conviction, under any subsequent complaint for

violation of this chapter. Further, the Dune Program Director shall coordinate his efforts with those of the Dune Inspector(s) to the end that the purposes of this chapter may be achieved.

11-4 ENFORCEMENT AND PENALTIES.

§11-4.1 Enforcement.

- a. The Borough Dune Inspector or, in his absence, the Chief of Police, and in all events, the Borough Council shall enforce the affirmative duty of each oceanfront owner, as set forth in this chapter.
- b. The initial enforcement effort shall be by service of a written notice, certified mail return receipt requested, upon the record owner at his last known address as set forth in the Borough tax rolls, requesting specific compliance with these obligations concerning dune protection and/or restoration, at the expense of the owner.
- c. The notice shall also advise that unless the owner shall take appropriate corrective action and complete the same within thirty (30) days from the day of mailing of the notice, the Borough may perform such acts of protection and/or restoration.
- d. Such expenditures by the Borough, if any, shall be due and payable by the owner upon demand. In the event that any such owner shall fail to pay, then the sum, together with interest at the highest legal rate thereon, shall become a lien upon the property and be collected in the same manner as delinquent real property taxes in accordance with N.J.S.A. 40:48-2.12f. The Borough may, in any event, seek injunctive relief from any violation of this chapter.
- e. In addition to the action described above, or alternatively, the owner may, at the election of any enforcement official or the Borough Council, be prosecuted in the Municipal Court for violation of this chapter.

§11-4.2 Copies of Regulations Furnished.

A copy of this chapter shall be furnished to all oceanfront property owners and to each applicant for a building permit for any construction east of Ocean Avenue south of Lyman Street and east of East Avenue, north of Lyman Street. Compliance with this subsection shall not be a jurisdictional prerequisite in any enforcement.

§11-4.3 Penalties.

For each and every violation of this chapter or violation of the regulations or standards set forth in the Appendix to this chapter, or the terms and conditions of any permit issued hereunder, the owner of lands abutting the beach or dune area where such violation has been committed, and any contractor or agent of the owner, or the trespasser (if the violation is of §11-3.2), shall for each and every violation be subject to the penalties set forth in Chapter I, Section I-5. Each and every day that such violation continues shall be considered a separate violation of this chapter.

APPENDICES TO CHAPTER XI PROTECTION OF BEACHES AND DUNES

Appendix I to §11-3.3, Dune Walkways, Pathways, Platforms Backslope and Foreslope Steps.

a. Pathways.

1. A singular natural path or improved walkway for each residence may be used to access the ocean, beach or any dune platform. Natural sand pathways are permissible unless they demonstrate that significant use is causing a chronically occurring crest line gap as defined under Section 9-2 of this appendix; which will subsequently require that the owner correct the issue and install an improved walkway. If an improved walkway is required by the Borough or desired by the owner to be used to access the ocean or any dune platform, the pathway shall be protected by placing suitable wear resistant material on the sand surface with a maximum width of four (4) feet as limited under NJDEP CZM Regulations. This surface may be constructed on grade of natural I-5 soil aggregate gravel or temporary removable walkways, geotextile access surface mats, or other modular components. Temporary walkways may be placed directly on the dune surface and may remain in place as long as they are not found to be a detriment to maintaining the minimum dune crest elevation consistent with the USACE Beach and Dune project elevation of Elevation 22.0 NAVD88 as measured by the Dune Inspector.

2. A crestline gap is a first point of entry for the ocean in a storm. The depth of a crestline gap is the vertical distance between the bottom of the pathway through the crest of the dune and a line connecting the highest points of the dune with twenty (20) feet on either side of the pathway. If the crestline gap depth is one (1) foot or more at any time, the area shall be restored with material of such grain size, shape, color and other characteristics as will, in the judgment of the Dune Consultant or Dune Inspector, be compatible with the existing on-site sand to its prescribed elevation by the owner at their own expense. Crestline gaps do not need to be addressed or remedied if the lowest elevation of the gap is above the USACE prescribed Dune Crest Elevation of 22.0 NAVD88. Pathways are to be routinely maintained by the owner to avoid repetitive developments of crestline gaps. If it is observed by the Dune Inspector that the individual property has a chronic problem with the development of repetitive crestline gap violations, he will be required to install an improved walkway at the direction of the Dune Inspector. Chronic problems will be categorized by the observance of more than three (3) crestline gaps which were repaired in the past at the direction of the Dune Inspector.

b. Foreslope Steps.

1. An unprotected dune foreslope is particularly vulnerable to damage by foot traffic. Accordingly, where foot traffic is very light, the pathway may remain as sand or owners may use protective means such I-5 soil aggregate gravel, cleated ramps, on grade stairs or similar devices which may be removed by the owner when the premises are not occupied or during seasonal storms where damage to same is likely.

2. When, in the judgment of the Dune Inspector, foot traffic is causing more than minimal damage to the foreslope and, in all circumstances, whenever foot traffic has caused the pathway over the foreslope to be at least one (1) foot lower than the adjacent sand surface in any location, the area shall be restored with material of such grain size, shape, color and other characteristics as will, in the judgment of the Dune Consultant or Dune Inspector, be compatible with the existing on-site sand to its prescribed elevation by the owner at their own expense; and more positive protective measures shall be installed as discussed in Section 1 above. In addition, if the owners are having difficulty in ascending the dune foreslope at the prescribed USACE slope of 1V to 5H on-grade, steps may to be erected by placing stringers

directly onto the dune foreslope with steps consisting of up to 2" x 12" planks. Stringer dimensions shall not exceed 2" x 12" with the steps secured to notches in the stringers or cleats installed within the overall vertical dimensions of the stringers. The steps cannot exceed 4' in width and should be constructed in a manner which will facilitate optional removal during the winter or the anticipation approach of strong seasonal storms or when the premises are not occupied; upon temporary removal, the pathway should be protected by sand fence. Steps may be secured in place to prevent wind uplift, incidental movement near the toe of dune from wave forces and sliding with earth anchors or timber 4" x 4" posts sunk into the foreslope surface near the toe of the dune. However any posts shall not be utilized to vertically support the stairs unless approved under permit from the Construction Code Official to meet DCA foundation requirements for wave scour and wave forces. Posts shall only be used for lateral stabilization of the on-grade stringers.

c. Walkways.

1. On - Grade

a. Shall be constructed with the use of stringers of no greater than six (6) inches in vertical section placed directly on grade, the use of a singular handrail may be installed on one (1) side of a walkway or steps to facilitate stability when negotiating the steps or walkways. Handrails shall be no more than two (2) inches in vertical section, all to limit debris if swept away in any storm surge and also to limit visual interference of the dune and ocean to the views of adjoining properties. Planking no more than 6 inches in width and with a maximum gap area between planks of ½ inch may be secured to the top of the stringers. Walkway components shall be constructed, as possible, to facilitate optional removal for periods of non-use, anticipated storm impacts or future dune development or maintenance.

b. Posts shall not be utilized to vertically support walkways, but only for lateral stabilization. Walkways may be secured with earth anchors strapped to the frame to resist wind uplift at the owner's discretion.

c. When, in the judgment of the Dune Inspector, the walkway is deemed to be jeopardizing the integrity of the dune system, by allowing the desired dune crest grade or dune slope surfaces to be lowered by more than one (1) foot below the improved USACE dune template surface, the area shall be restored with material of such grain size, shape, color and other characteristics as will, in the judgment of the Dune Consultant or Dune Inspector, be compatible with the existing on-site sand to its prescribed elevation by the owner at their own expense.

2. Elevated

a. Shall be constructed with the use of stringers and bridging of no greater than six (6) inches in vertical section, stringers may be sistered together horizontally for added strength. Handrails may be constructed as required by building code, but shall be no more than two (2) inches in vertical section. Planking shall be no more than 6 inches in width with a maximum gap area between planks of ½ inch. Top of planking shall not exceed elevation 22.7 NAVD88 for the entire walkway in USACE constructed dune crest areas but may exceed this height when crossing naturally higher dune elevations or connecting to decks, stairways or stairway landings attached to existing or approved primary residential structures. Elevated walkway structures shall be designed to facilitate removal for extended periods of non-use, and accommodate future dune development and maintenance where possible. The vertical

maximum 6" vertical section and maximum walkway height shall be maintained to minimize visual adverse impact to the views of the dune and ocean from adjoining properties.

b. Walkways may only be elevated upon approval under a Borough dune permit and in accordance with the Borough's Chapter XXIII Flood Damage Prevention Ordinance, Section 23-5.3 through additional approval of the Borough's Construction Office by associated permitting procedures and if built within a "VE" Zone designed for wave forces and scour. Supports for elevated walkways shall be designed to address the impacts of, and to, the stone revetment installed within the dune system for properties North of Lyman Street or the steel sheet pile sea wall's geotextile scour apron within the dune system for properties South of Lyman Street.

c. When, in the judgment of the Dune Inspector, that the walkway or walkway supports are deemed to be jeopardizing the integrity of the dune system as demonstrated by observed damage to the dune, the damaged area shall be restored with material of such grain size, shape, color and other characteristics as will, in the judgment of the Dune Consultant or Dune Inspector, be compatible with the existing on-site sand to its prescribed elevation by the owner at their own expense.

d. Dune Platforms.

1. One (1) dune platform per property may be constructed within the dune system with neither length nor width greater than eighteen (18) feet. stringers or ledger boards shall be no greater than six (6) inches in vertical section placed directly on grade, handrails may be constructed but shall be no more than two (2) inches in vertical section and constructed of vertical supports with a maximum horizontal section of four (4) inches to minimize visual obstructions to the views of adjoining properties. Planking shall be no more than 6 inches in width and the maximum gap area between planks shall not exceed ½ inch. Top of planking shall not exceed elevation 22.7 NAVD88 in USACE project constructed crest areas, however, may be a maximum of 8 inches above existing grade in natural dune areas of a higher grade. Structure shall be constructed to facilitate removal for periods of extended non-use, dune development and dune maintenance, etc.

Existing Borough approved platforms that exceed these elevations may remain as non-conforming structures.

2. Platforms shall be located such that the eastern edge is a minimum of ten (10) feet westerly of the seaward dune crest and the northerly or southerly edge is a minimum of ten (10) feet off of the property line.

3. Due to DCA restrictions, posts shall not be utilized to secure platforms to grade unless they are designed to meet foundation criteria for structures in a "VE" Zone. Platform shall be secured either with earth anchors strapped to the frame to avoid these foundation requirements or if found absolutely necessary to support off of posts in areas of a natural dune to address uneven or undulating grades, they must comply with foundation requirements in accordance with Chapter XXIII Flood Damage Prevention Ordinance Section 23-5.3. Utilizing of Chapter XXIII Flood Damage Prevention Ordinance Section 23-5.3 to secure the platform will necessitate additional approval of the Borough's Construction Office by associated permitting procedures, platform supports and foundation shall also be designed to address impacts to the stone revetment installed within the dune system for properties North of Lyman Street or the geotextile scour apron within the dune system for properties South of Lyman

Street. Foundations utilized for platforms must address wave forces and scour as deemed required by Code and certified by the owner's engaged New Jersey Professional Engineer.

4. When, in the judgment of the Dune Inspector, the platform is deemed to be jeopardizing the integrity of the dune system by physical disturbance, the disturbed area shall be restored with material of such grain size, shape, color and other characteristics as will, in the judgment of the Dune Consultant or Dune Inspector, be compatible with the existing on-site sand to restore it to its prescribed elevation by the owner at their own expense.

(Ord. No. 407 App. to 11-3.3)

Appendix II to §11-3.7, Vegetation and Sand Fencing.

a. *Dune Planting.*

1. For initial planting, or replanting sparse areas, "Cape" American beachgrass (*Ammophila breviligulata*) should be used. The entire Dune Area (including the crest and the Backslope and Foreslope of the Dune) shall be planted. The Borough independently or in conjunction with the NJDEP or USACE will install dune grass on the USACE project constructed dune and shall restore same when damaged in conjunction with dune restoration from damage incurred as a result of a major storm meeting NJDEP CZM rules to allow dune restoration. Damaged vegetation from minor storm events may be alternately replaced by the property owner. In addition, at the owner's discretion up to fifty (50%) percent of Panicum Grass (panic grass) can be mixed in the planted area.

2. Planting for bare stollen dune grass may take place any time between October 15th and April 1st, if the ground is not frozen. Spring planting should be accompanied by frequent watering. Initial and subsequent fertilization is recommended at the rate of approximately two (2) pounds of slow-release 10-10-10 fertilizer per one thousand (1000) square feet. If the ph is lower than seven (7), then a treatment to raise ph should be applied (ph+ or limestone).

Plantings of pot grown dune grass stock may be planted at any time suggested by the nursery.

3. Fresh bare stollen planting stock cut back to sixteen (16) to eighteen (18) inches long are preferred to be utilized. Spacing shall be no greater than eighteen (18) inches on the dune foreslope and crest and twenty-four (24) inches on the dune backslope, two (2) stems to a hole, at least seven (7) inches deep. If not planted with a water flooding method, the sand shall be compacted to eliminate air pockets.

Plantings of pot grown stock shall be done at the same spacing with depth as suggested by the nursery.

4. Sand placed by earth moving equipment shall be allowed to become compacted by rains before planting commences.

5. After beachgrass has been established, other appropriate vegetation may be added.

b. *Sand Fencing.*

1. Fencing shall be standard four (4) foot wood sand (snow) fence, or cut in half for half fence, in good condition, secured to wooden posts of a minimum cross-section of four (4) square inches and a minimum length of two and one-half (2.5) feet more than the height of the fence, with maximum span between posts of twelve (12) feet. Alternate fencing, as approved by the Dune Inspector with advice of the Dune Consultant, prior to installation, may be utilized.

2. A row of fencing shall be permitted at the easterly toe of the dune, the westerly limit of the dune, along each northern or southern property line and also on each side of any beach path, if desired. If the dune is fully planted and vegetation fully established, specifically as a result of the USACE Beachfill and Dune Project work, no additional fencing will be required by the property owner.

3. A straight (or zig-zag) line of fencing may be erected adjacent to the seaward toe of the dune to prevent pedestrian intrusion into the Dune Area, but no more than three (3) feet from the seaward side of the dune.

(Ord. No. 407 App. to 11-3.7)

Appendix III to §11-3.8, Bulldozing and Mechanical Replenishment of Sand.

a. Dune Location and Other Dune Parameters.

1. A severe storm may cut a sharp cliff or scarp in the dune system, as a straight or slightly curving continuous line the length of the beach, although there may be gaps in the line where the ocean has broken through. Successive storms cut scarp lines that are essentially parallel, the more severe the storm the more westerly the scarp line. Remedial action after a severe storm consists of bulldozing about the same amount, depending upon the amount of sand available in the post-storm berm, up against the scarp line, leaving the Seaward Edge of the Dune in an approximately parallel continuous line. Therefore;

2. It is desirable to have a continuous dune system. No bulldozing permit will be granted if to do so would result in displacement of the Seaward Edge of the Dune of that property more than five (5) feet seaward of the prevailing Edge of the Dune as initially constructed under the USACE Beachfill and Dune Project, subsequent Borough implemented projects, or as approved by the Dune Consultant in potential non-USACE project areas, unless the toe of the dune has migrated easterly by natural accretion. If natural accretion has occurred the dune shall match the toe on adjacent lots. Bulldozing may only be conducted in accordance with the restrictions of NJDEP CZM regulations and the Borough's prevailing GP-2 permit.

3. When a severe storm erodes the dune and especially if the erosion is past the prevailing Dune Crestline, it can potentially break through the dune system to flood the Borough and/or wash away neighboring houses; therefore it is important to define a minimum Dune Height and other parameters of dune dimension;

4. Therefore, the Borough of Mantoloking, in consultation with the Dune Consultant, shall make repairs to the damaged dune in conjunction with relevant State and Federal authorities to achieve certain standards of minimum dune height and dimensions, by affirmative action up to the adopted dune easement line, including the transport to the Dune Area of suitable off-site sand, including vegetation of same, if, in the opinion of the Dune Consultant, achieving those criteria by natural processes would be protracted or would present unacceptable risk to the public interest. The standards are hereby established as that of the United States Army Corp of Engineers dune profile developed during the Manasquan Inlet to Barnegat Inlet, New Jersey Hurricane and Storm Damage Reduction Project, which is on file with the Borough, but basically includes: a dune crest a minimum of 25' wide at Elevation 22.0 NAVD88; a foreslope and backslope with a 5H:1V ratio extending from Elevation 22.0 NAVD88 to Elevation 8.5 NAVD88 or existing grade of the beach or landward limit whichever is lower. The dune configuration and minimum criteria shall also include full vegetation with Cape American Beach Grass spaced at 18 inches on center on the dune crest

and foreslope and at 24 inches on center on the dune backslope with the placement of sand fence at the seaward and landward toe of the dune. The Borough is committed to complete repairs to the dune system, however, an individual property owner may supplement these efforts for repair of minor damage to the dune system by implementing bulldozing and plantings by their own efforts when "allowed" under the construction of the NJDEP CZM regulations and as approved under a Borough issued dune permit.

Appendix IV to §11-3.9, Permits.

a. *Permits.*

1. Permits required under this chapter shall be issued at no charge by the Borough Clerk in the Borough's form and requiring such application data as shall be prescribed by the Dune Program Director after consultation with the Dune Consultant. No permit shall be issued unless approved by the Dune Inspector.

2. The grant of any permit may be withheld for a period of up to 60 days on any property for which the Dune Inspector, with due regard to the then existing conditions of beach and dune, determines it is necessary to impose criteria more restrictive than set forth in this Ordinance, if the Inspector, in consultation with the Dune Program Director and Dune Consultant, believe the more restrictive criteria would more appropriately enhance the attainment of the goals to be achieved by this chapter. The Dune Inspector shall formally request the more restrictive criteria be imposed by ordinance of the Borough Council. In the event more restrictive criteria are not approved by the Borough Council within 90 days of the request of the Dune Inspector, the Inspector shall apply the existing ordinance provisions to the Permit under consideration.

3. Any owner aggrieved by the terms, conditions, denial or revocation of a permit issued or applied for under this chapter may appeal the action by written petition to the Borough Council within fourteen (14) days of the issuance or denial of any permit. Council may, upon hearing, and in summary fashion, modify, affirm or rescind the permit or the decision of the Administrative Officials.

4. Nothing herein shall be interpreted to give the Borough of Mantoloking or its officers the Authority to require a homeowner to remove a properly permitted and installed walkway, dune deck or stairs except as may be necessary to resolve a direct conflict with same and the required USACE Beachfill and Dune project dimensions and template or as necessary to facilitate maintenance or restoration efforts to be undertaken by the Borough independently or in conjunction with a NJDEP or USACE project or restoration effort.

SECTION 2. All ordinances or parts of ordinances inconsistent herewith are hereby repealed.

SECTION 3. If any section, subsection, sentence, clause, phrase or portion of this ordinance is for any reason held to be invalid or unconstitutional by a court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions hereof.

SECTION 4. This ordinance shall take effect after second reading and publication as required by law.

NOTICE

NOTICE IS HEREBY GIVEN that the foregoing ordinance was introduced and passed by the Borough Council on first reading at a meeting of the Mayor and Council of the Borough of Mantoloking held on the 20th day of February, **2018**, and will be considered for second reading and final passage at a regular meeting of the Borough Council to be held on the 20th day of March, **2018** at 5:30 p.m. or soon thereafter as this matter can be reached at the Mantoloking Yacht Club located at 1224 Bay Avenue in Mantoloking, New Jersey, at which time and place any persons desiring to be heard upon the same will be given the opportunity to be so heard.

MANTOLOKING POLICE DEPARTMENT

Chief of Police
Stacy S. Ferris

03/07/2018

Mayor & Council

Please accept the following as the monthly report for the Mantoloking Police Department.

Dispatch:

- We responded to calls for service including 13 agency assists
- 1 warrant arrest, 3 first aid calls & 5 Suspicious vehicle/person calls
- 11 Alarm calls, 1 prisoner transport & 1 DWI
- 2 theft, 1 vehicle burglary

**The above is a just some of the calls responded to.

****Special Alerts**:**

- ❖ Please remove all valuables from your vehicles including key fobs. We have had one vehicle burglary and have increased patrols on the side streets as reports of suspicious vehicle have increased in this town and others.
- ❖ The Seaside Heights Saint Patrick's Day Parade is this weekend, expect heavier than normal traffic on Rt. 35. Additional patrols have been added to handle the extra volume.
- ❖ Use caution using the Princeton walkway, currently it is shared with vehicles and they may not be able to see you. We are taking action to create a pedestrian only section.

General information:

- Herbert Street and 1107 beach walkways are currently closed. All other walkways are open to pedestrian traffic.
- Security Cameras – If you have them please update your “We Care Form”, and make sure that you check their positioning to make sure that they are properly placed and have not moved in the high winds.
- Home Health Aid employees - If you are using in home care please make sure they are licensed and that you have a copy of their ID on file in your home. For extra protection you can call the police department and have them identified and checked prior to them starting to work for you. We have had unlicensed workers in homes that have stolen medications.

Budget:

- 2017 year end: Budgeted O&E: \$149,500. / Spent: \$162,258 (+\$12,758)
Budgeted S&W:\$1,124,150 / Spent:1,082,893 (-\$41,257)
as of 2/28/2018
- 2018 projected: Budgeted O&E:\$158,550
Budgeted S&W:\$1,094,491
*Represents a .63 % increase over 2017

Contact Information for the police department:

- **732-295-1465 is the 24 hour phone number** to the police department. It is manned by the Ocean County Sheriff's Department. This is for non-emergency calls, for example; animals, parking and noise complaints. **911** is for all emergency calls.
- **732-295-1401** is the inside administration line that is manned from 9 AM to 4 PM, Monday thru Friday. All calls after 4 PM should be directed to 732-295-1465

Upcoming events:

- March 10th – Seaside Heights Saint Patrick Day Parade - MPD will be taking part in an enforcement detail with the Prosecutors office, NJSP & other local departments. Extra patrols will be on from 12PM to 11PM funded by the County Prosecutors office.

Fleet Status:
